

Glacier Review

Across

2. Large crack in an ice sheet or glacier
4. Bowl shaped depression carved by a glacier
6. Dark and light bands caused by glaciers speed
7. Irregular shaped hill made of sand, gravel, till
10. Moraine that occurs on edges of glacier
12. One of two slowest moving parts of glacier
17. Bedrock formation made by glacier
19. Causes glaciers to flow slowly at sides/bottom
20. Scoured into bedrock by rocks on btm of glacier
21. Elongated egg resembling a half-buried egg
22. Pothole formed by retreating glacier
23. Moraine left behind as glacier recedes
24. Shape of valley formed by a river

Down

1. Shape of valley formed by a glacier
3. Ridge formed by glacial erosion on two sides of mtn
5. long winding ridge of sand or gravel
8. One of two fastest moving parts of a glacier
9. Mostly melting, reducing of glacier

11. Refers to area consisting of upper portion of mtr
13. Joins another valley at higher elevation
14. U-shaped valley carved by glacier
15. Peak formed by glacial erosion on >3 sides of mtr
16. Moraine that occurs when two glaciers intersect
18. Refers to a very large landmass
