

Science Fair Project Proposal

It's time to start thinking about a Science Fair project. Using what you have learned about the scientific method, you should be able to choose a project that includes **independent and dependent variables** and a control. **If you can't identify these variables, it's probably not a good project.** Also, ask yourself if you will be able to do the project with the resources you have access to. You may use the internet or books for ideas, but **try to make the project unique.**

Question:

Independent Variable:

Dependent Variable:

How will you measure the dependent variable?

Control:

Constants (what will need to be kept the same):

Teacher Comments:

☐ **Approved** ☐ **Needs Rethinking** ☐ **Won't Work** ☐ **Too Simple**
